eCQM Next Generation of Hospital Quality Reporting Navigation Guide

Fall 2019

Overview

In the fall of 2018, CMS began implementing updates to the Hospital Quality Reporting (HQR) system, accessible via the *QualityNet Secure Portal*, to improve the experience for program stakeholders. These new, enhanced features of the User Interface (UI) were integrated as part of the Next Generation of Hospital Quality Reporting. The scope of this document is limited to instructions for hospitals and vendors to access the upgraded electronic clinical quality measures (eCQM) UI for the 2018 reporting period and beyond for the Centers for Medicare & Medicaid Services (CMS) Hospital Inpatient Quality Reporting (IQR) and Promoting Interoperability Programs.

Upgraded eCQM UI - Next Generation Hospital Quality Reporting

Users are able to view eCQM data from calendar year (CY) 2018 and forward using the upgraded UI within the *QualityNet Secure Portal*. Follow the instructions below to access the upgraded eCQM UI:

- 1. Navigate to the *QualityNet* website.
- 2. Select Log In under the Log in to Secure Portal header.
- 3. Select HQR Next Generation from the Select Your QualityNet Destination dashboard.

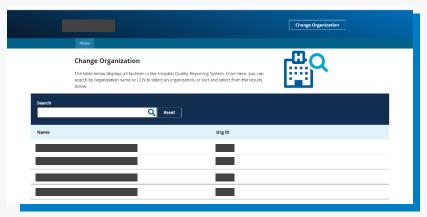

4. Select Let's Go.

- 5. Enter your *QualityNet* User ID, Password, and Security Code. Then, select Submit.
- 6. Read the Terms and Conditions statement. Then, select I Accept to continue.
- 7. Users are presented with the "Welcome to Hospital Quality Reporting!" home page. NOTE: Users who want to return to this home page at any time, can click the Home button at the top of the screen.
- 8. Hospitals and vendors, reporting on behalf of one hospital, will be presented with **eCQM** for selection; vendors and other users who have access and permission to submit on behalf of multiple hospitals must select **Facilities List**.

The P	elcome to Hospital Quality F cards below display each part of HQR you h Public Reporting Treview of Hospital Compare tap prior to public display.		ling card to see more de	stalled information on that item.	

12. Upon selection of **eCQM**, the upgraded UI defaults to the Files tab where a user can view QRDA Category I file uploads for test and production submissions. The Upload History defaults to test; the user has the option to view test or production batch QRDA Category I file submissions from the drop-down menu. To view Production submissions, select **Production** from the drop-down menu and click the **Change Selection** button. The page will refresh.

	Submission	
	Test The table below displays all file uploads. You can view files in either test or production. From here, you can search for other files, or sort the results to view file status and download results.	
)	Change Selection	

13. The Files Upload History UI displays the following details for test and production file submissions: batch file name; batch ID; file size; upload date; identifies who uploaded the batch file; the status of the hospital's submission; and provides the ability to export the errors for the specified batch of QRDA Category I files. The "Ready" status indicates users are able to download the files by batch. The statuses of "Processing" and "Deleted" are also available. The "Processing" status indicates that the submitted batch of QRDA Category I files is still in progress at that moment in time. The "Deleted" status will only be displayed when the complete batch is deleted.

15. When a user returns to the **Files Upload History** UI and selects the **Accuracy** tab at the top of the page, additional eCQM file validation submission data are available.

NOTE: The UI defaults to the **Test** submission type and the most current CY quarter; the user has the option to select test or production submissions in the drop-down menu. If data are not currently available for the selected submission type and quarter, a message will display indicating no data are currently available as shown below.

view files in either test	ys all file uploads. You can or production. From here, er files, or sort the results to wnload results.	,	O Accepted Files
Submission	Quarter	0 Total Files	0
		•	Rejected Files
Search	ge Selection		
Search	Q Reset		Export Results

16. After selecting the **Submission** type and reporting **quarter**, click the **Change Selection** button. The UI will refresh and provide a status of all QRDA Category I patient-level files submitted for that quarter. Users are able to perform a further search for a specific patient file. For example, if a user would like to review the rejected files, select the Rejected Files button to display the QRDA Category I patient files with a "Rejected" status.
